EDUCATION

Bachelor of Science in Computer Science

May 2028

Towson University, Towson, MD

- Honors College Scholar | Greater Washington Scholarship recipient | ODK | UPE | NSCS

EXPERIENCE

Software Developer — SecurEd Inc.

August 2026 - Present

- Develop and refine responsive interfaces for CLARK, a cybersecurity education platform hosting 2,240+ learning objects and 2,740+ resources, using React, TypeScript, and Material UI.
- Translate design requirements and wireframes into reusable front-end components, improving consistency, usability, and accessibility across platform workflows.

Undergraduate Research Assistant — Towson University

October 2025 - Present

- Conducted literature reviews on authentication, cybersecurity, and accessibility to identify usability barriers affecting diverse users.
- Analyzed existing authentication workflows and synthesized human-centered security recommendations from the research.

Software Development Intern — SecurEd Labs

June 2026 - August 2026

- Built an internal React/TypeScript analytics dashboard and monthly reporting tool for CLARK, a cybersecurity education platform serving thousands of curriculum resources, using Material UI and REST APIs to support leadership reporting.

PROJECTS

OneTap — Accessible Authentication Research Project

October 2025 - Present

- Designed and prototyped a React-based multimodal authentication system balancing accessibility, usability, and security across fingerprint, PIN, voice, gesture, and NFC workflows.

Code/Clash Hackathon Platform

July 2026 - August 2026

- Built the official platform for Towson's first hackathon in eight years, supporting registration, scheduling, and team formation for a planned 24-hour event serving 60–120 students.
- Integrated Supabase and PostgreSQL for team invitations and registration, then deployed the site through GitHub Pages with a custom domain.

Tasky — Software Developer (Team Project)

December 2025 - January 2026

- Delivered an internal MERN task-management platform for GoPanda's product team, supporting tickets, comments, assignments, activity tracking, and status workflows.
- Contributed to a production-oriented application with 20+ REST endpoints, RBAC, audit logging, and five-tier rate limiting using React, Node/Express, and MongoDB.

SKILLS

- **Languages:** Java, C++, JavaScript, TypeScript, HTML/CSS • **Frameworks/Technologies:** React, Vite, Material UI, Node.js, Express.js, MongoDB, PostgreSQL, Supabase • **Tools:** Git, GitHub, Docker, Figma
